| Hi-Fi Components - Headphones<br>Dharma 1000 | Dharma 100 Is an Electrostatic/Dynamic Hybrid Stereo Headphone. The result, not unexpectedly, is high frequency response that extends to 40kHz, and sweet, nuanced, sound that will take your breath away. Augmenting the electrostatic HF element for lower frequencies is a 52mm Washi paper based dynamic driver, which provides not only bass extension to 5Hz, but palpably impactful mid bass as well. It transitions seamlessly to DHARMA's electrostatic tweeter with a phase coherent first order slope. At 450 grams, DHARMA is comfortable. It is also an ergonomic and stylish design featuring a high-grade aluminum alloy housing and sound that will envelope the listener in nothing less than electrostatic serenity. Frequency Response 5Hz-40kHz Nominal Impedance 26 Ohms; THD Less than 0.3% (1 kHz, 1mW) Sensitivity 103dB @ 1Vrms Configuration Around the ear, open back Headphone Jack Standard 1/4" (6.3mm) stereo Weight 15.8 oz (450g) without cable; Cable Length 9.8 feet (3 m) | € 1750,00 |
| Speakers - Bookshelf Speakers<br>Sopranino   | Elettrostatic Super Tweeter Sopranino extends high frequency response to over 40kHz and operates via totally passive connection, with selectable 8k, 10k, or 12kHz crossover points, all of which further contributes to its ease of implementation. Sopranino's diaphragm is an ultra-thin polyester film membrane which operates by static attraction (as opposed to voice coils and magnets), with a fraction of the mass of conventional drivers. Nominal impedance 4 Ohms; Sensitivity (1m / 2.83V) 90 dB Crossover frequency (user selectable) 8/10/12 kHz; Crossover slope-12 dB / octave; Frequency response 8 - 40 kHz ± 3 dB Recommended input power to main system 50W; Dimensions 181mm W x 193mm H x 207mm D; Net weight 2.7 kg Optional Stand € 900,00  | € 4900,00 |

## Speakers - Bookshelf Speakers

### Mythology M1

**Elettrostatic Full-Range Monitor System The Mythology M1** represents a significant step forward in mini monitor loudspeaker design. The most striking, and telling, aspect of its design is the seamless blending of dynamic drivers with an electrostatic super tweeter in an augmented 2-way configuration. Sensitivity 85dB(2.83V/1m); Amplifier power 50-200W/channel Peak power handling 80/150W; Nominal impedance 4Ω Minimum impedance 4Ω/47Hz; Frequency response 40kHz(w/Sopranino) Bass type Bass reflex; Woofer 180mm PP cone Tweeter 34mm soft textile dome; Crossover frequency 1,100 Hz Net Weight (speaker) 19 Kg; Net Weight (speaker stand) 20 Kg Net Weight (Super tweeter) 2.7 Kg

€ 16900,00

## Amplifiers - HeadPhone Amplifier

### Athena A1

The Athena A1 is an audiophile's dream. From its three dimensional soundstage to its ability to faithfully articulate voices and instruments, to separate and fix them in space, the Athena A1 is an engaging and musical headphone amplifier. Input Impedance 10k Ohms Maximum Output Voltage 20Vpp Total Power Consumption 15W Compatible Headphone Impedance Range 16-600 Ohms Circuit Configuration Pure Class-A single-ended triode with hybrid output stage. Tubes Premium grade Genalex Gold Lion ECC82/B749THD0.1% Dimensions 4.6"W x 7.3"H x 5.3"D (117mm x 185mm x 134mm) Net Weight 3.5 kg Frequency Response 5Hz -200kHz
